

Singapore Report

2024 Edelman Trust Barometer

Methodology

Annual online survey in its 24th year

Fieldwork conducted: Nov 3 – Nov 22, 2023

Data collected is representative of the general population across age, gender, region and ethnicity/nationality (where applicable) within each country.

Global averages

Unless otherwise indicated, global averages are composed of all 28 countries surveyed.

Statistical significance

(+)

0-0-

O Significant change

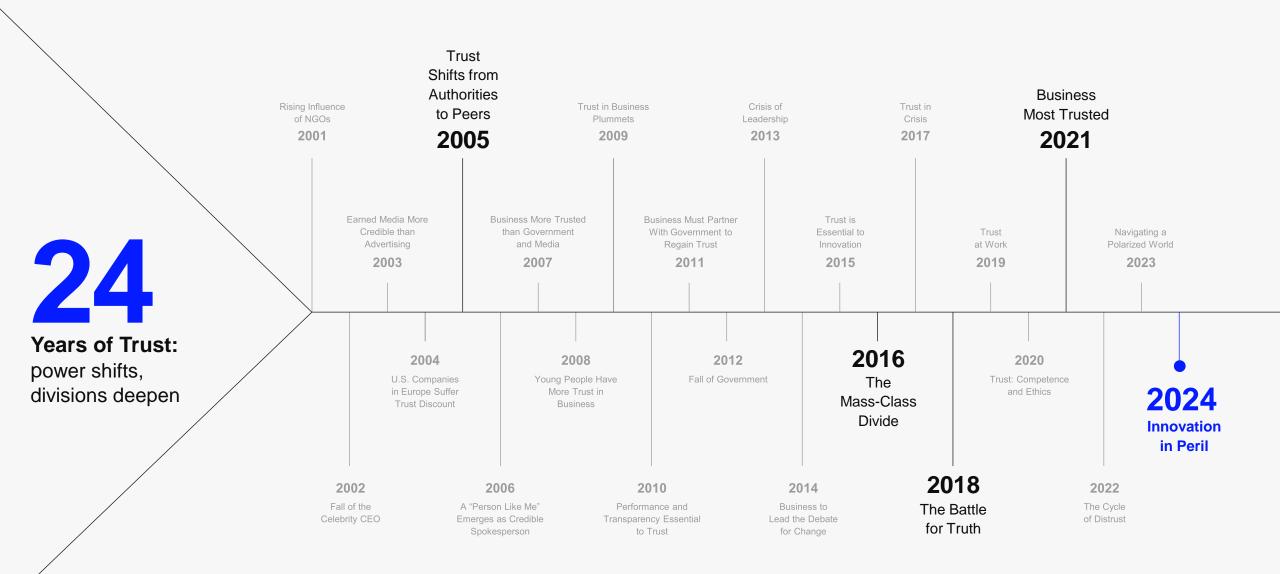

Indicates a statistically meaningful difference or change in the data that is unlikely to be due to chance or a random fluctuation.

All indicated year-over-year significant changes were determined using a t-test set at a 99%+ confidence level.

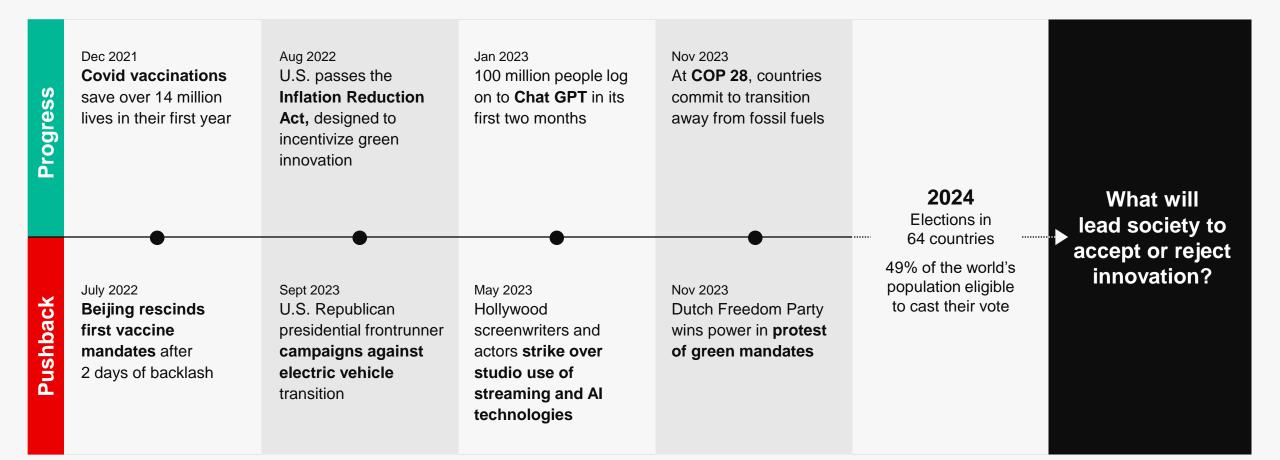

Shortened question text

Throughout the report, question text has been edited for readability.

For more details on global averages, country-specific sample information, or to see the full text for any shortened statements, please see the Technical Appendix

In Singapore, All Institutions But Media Trusted on Innovation

Percent trust, in Singapore

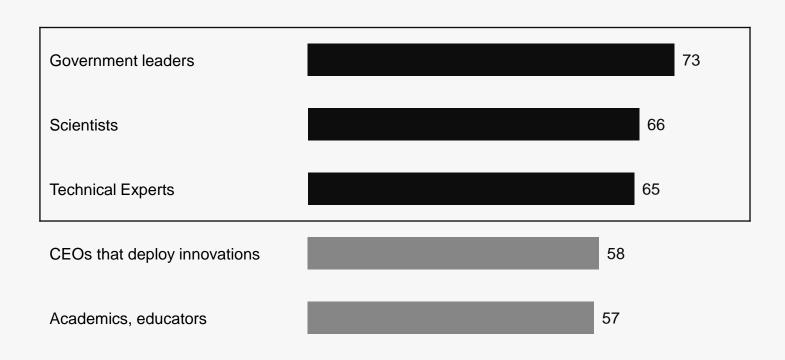

2024 Edelman Trust Barometer. TRU_INS_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them). 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 26-mkt avg, Singapore, and by income. Data for "Government" not collected in China or Saudi Arabia; not collected in China for "Media".

After Government Leaders, Scientists and Experts Expected to Lead on Implementation of Innovation

Percent who say, in Singapore

I believe each **should have a big role** in managing the introduction of innovation

Showing select 5 of 11 items

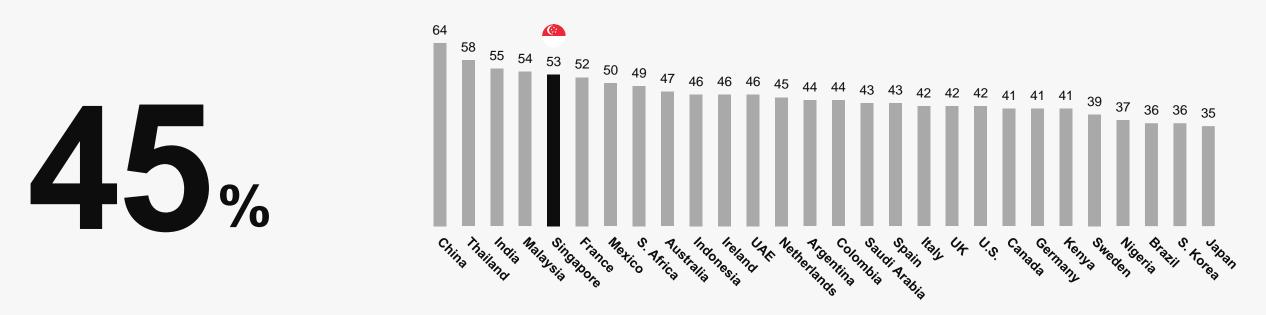

Edelman Trust Barometer. RSP_TEC_CHG. How big a role do you feel each of the following should have in ensuring that the introduction of new technologies and innovations is well-managed (e.g., they are safe, understood by the public, L____ficial to society as a whole, and accessible to the people who need them)? 5-point scale; top 2 box, a big or huge role. Question asked of half the sample. General population, Singapore. Data is showing the top 5 roles, with ties broken by decimal.

Make the Science Transparent and Accessible to the Public

Percent who agree

GLOBAL 28

Scientists do not know how to communicate with people like me

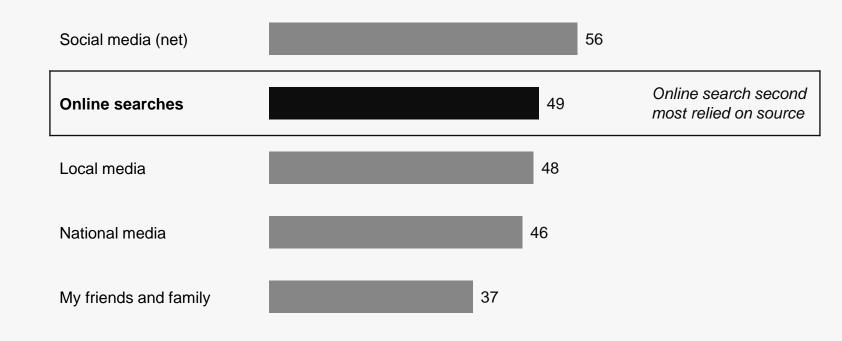

2024 Edelman Trust Barometer. CHG_AGR. Please indicate how much you agree or disagree with the following statements. 9-point scale; top 4 box, agree. Question asked of half the sample. General population, 28-mkt avg.

I'm Doing My Own Research: Help Me Find Information I Can Trust

Percent who say, in Singapore

This is where I get **most of my** information about new technologies and innovations

Showing top 5 of 9 items

2024 Edelman Trust Barometer. INO_INF_SRC. Where do you get most of your information and knowledge about new technologies and innovations from? Pick all that apply. Question asked of half the sample. General population, Singapore. "Social media" is a net of "My social media news feed" and "On social media posted by, or forwarded from, someone in my social network". Data is showing the top 5 sources, with ties broken by decimal.

CEOs: Address Impacts of Innovation in Society

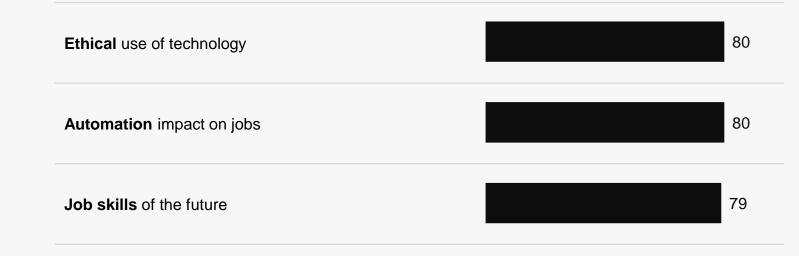

Percent who say, Singapore

63%

I expect CEOs to **manage changes occurring in society,** not just those occurring in their business

Among employees,

It is important to me that **my CEO speaks publicly** about issues such as:

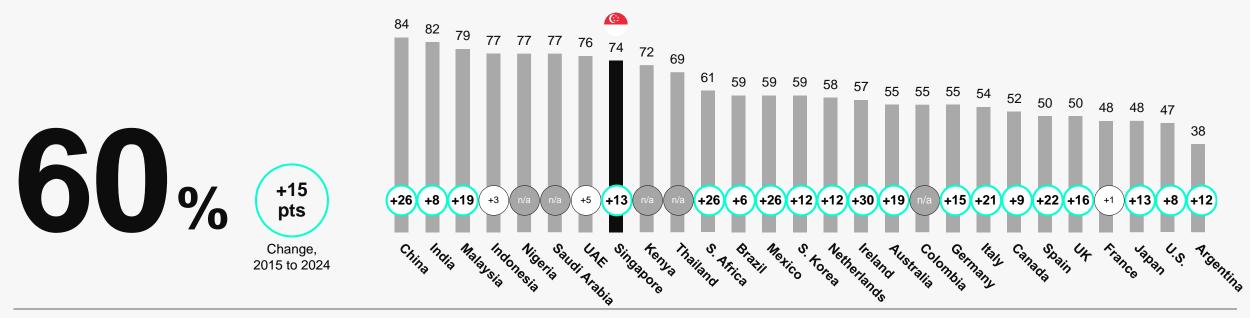

2024 Edelman Trust Barometer. CRSP_CHOICE. You are about to see two choices. We want you to choose the one that best describes your beliefs. Question asked of half the sample. CEO_ISS. How important is it to you that the CEO or head of the organization you work for speaks out publicly about each of the following issues? 9-point scale; top 4 box, important. Question asked of those who are an employee of an organization (Q43/1). General population, Singapore.

Over Past Decade, Demand for Business-Government Partnership on Innovation Surges

Percent who say

If business partners with government,

I would trust it more with technology-led changes

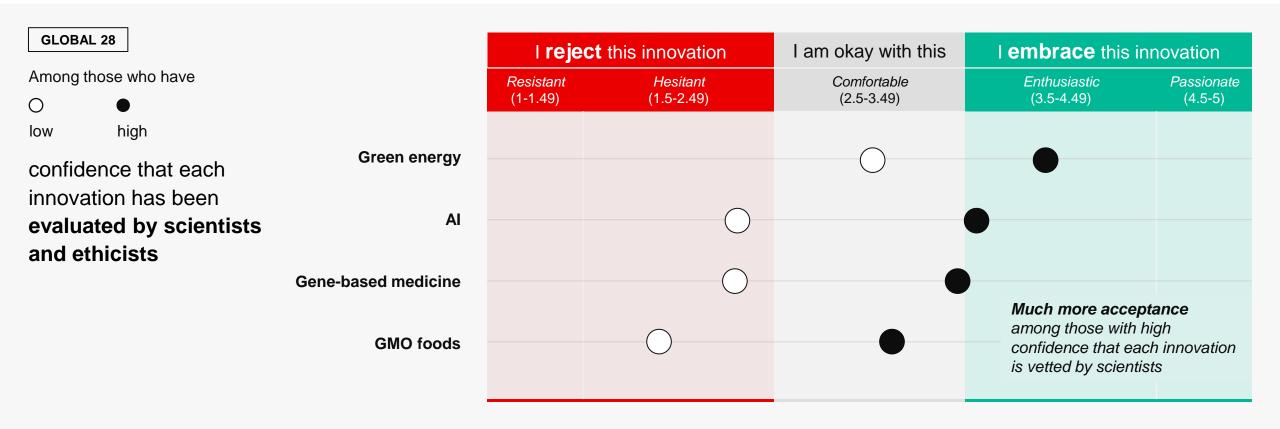

2024 Edelman Trust Barometer. INS_PTN. Below are a number of actions that could impact your trust in business and industry to develop and implement technology-led changes. What impact would each of these actions have on your trust? 9-point scale, top 4 box, trust business and industry more. General population, 22-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Restoring Trust in the Promise of Innovation

To Earn My Acceptance, Show Me the Innovation Is Vetted by Scientists and Ethicists

Average acceptance rating

for each innovation

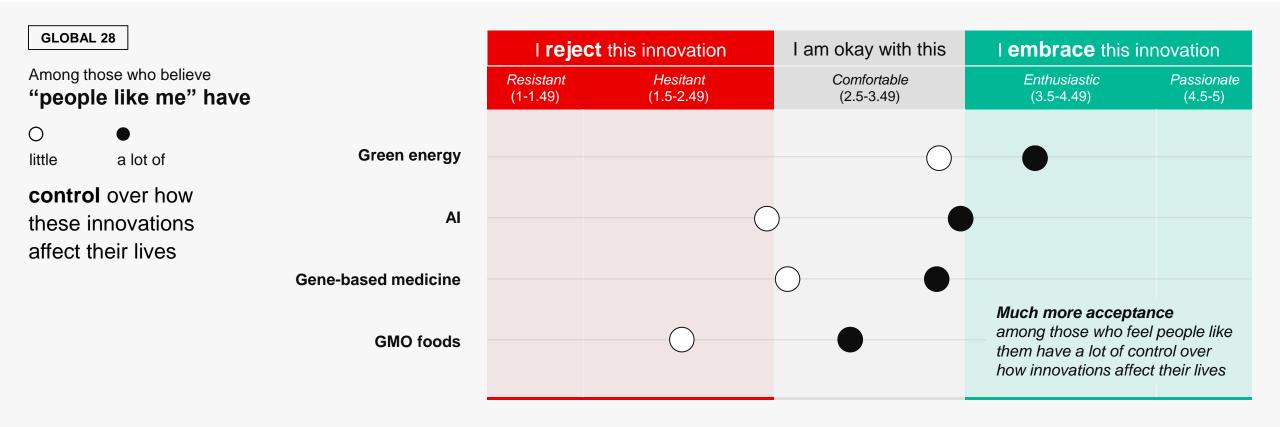

2024 Edelman Trust Barometer. TEC_TST. How confident are you that these technologies have been adequately tested, evaluated, and assessed by scientists, ethicists, and other experts? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

To Earn My Acceptance, Give Us Control Over the Impact of Innovations

Average acceptance rating

for each innovation

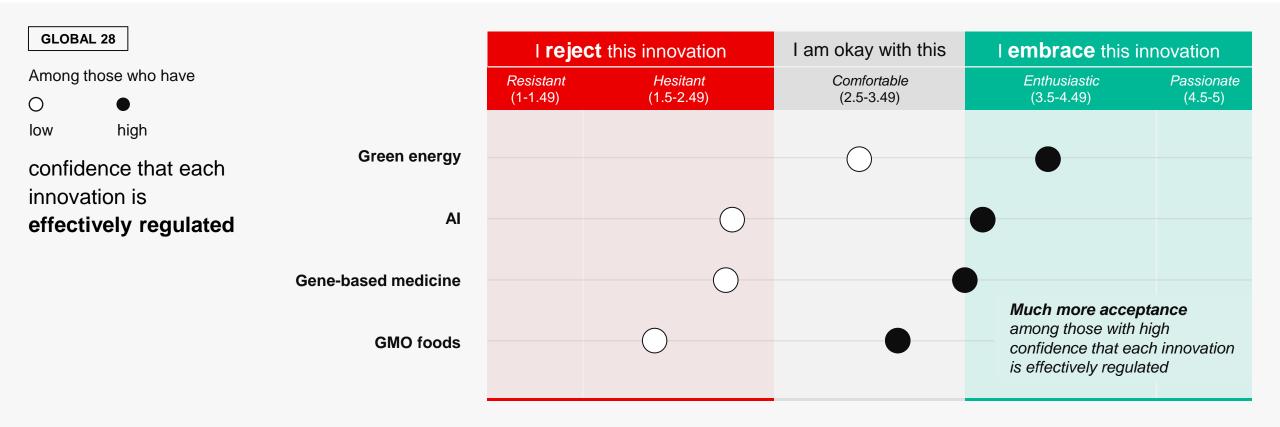

2024 Edelman Trust Barometer. TEC_INF. How much influence or control do you feel people like you have over how these technologies are used in ways that might affect their lives? 5-point scale; top 2 box, a lot of control; bottom 2 box, a little control. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of control. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

To Earn My Acceptance, Give Us Confidence in Effective Regulation

Average acceptance rating

for each innovation

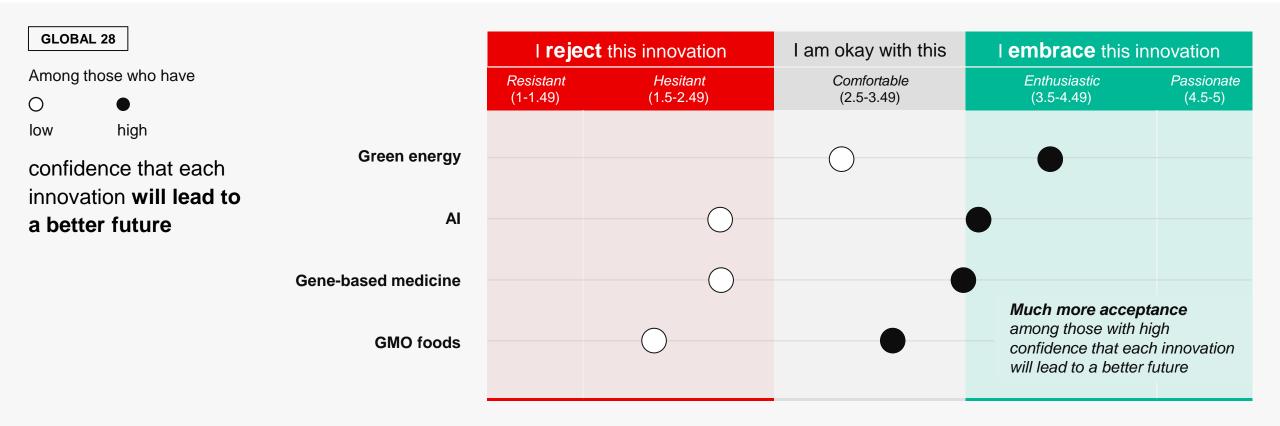

2024 Edelman Trust Barometer. TEC_SAF. How confident are you that each of the following is being effectively regulated? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

To Earn My Acceptance, Show Me How Innovation Will Bring Us a Better Future

Average acceptance rating

for each innovation

2024 Edelman Trust Barometer. TEC_FUT. How confident are you that these technologies will lead us to a better future? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

To Be Trusted With Innovation, Protect Core Values and Be Transparent About Benefits and Risks

Percent who say this is important to earning or keeping their trust in each institution to be good managers of change, in Singapore, showing the top 3 actions

For business and media, communication is a top 3 trust-building action

Business	%	NGOs	%	Government	%	Media	%
Keep innovations affordable	83	Protect our core values	81	Ensure our future prosperity	82	Communicate pluses and minuses	82
Communicate pluses and minuses	83	Aid the vulnerable	80	Protect our core values	82	Investigate innovations	81
Work with government to introduce change effectively	83	Help people keep up	79	Institute safeguards	82	Protect our core values	80

2024 Edelman Trust Barometer. INS_CHG_PER. If [Institution] wants to earn or keep your trust in their being good stewards or managers of change, how important is it that they do each of the following in response to the technological and social changes taking place in your country today? 6-point scale; top 3 box, moderately or more important. Media and NGOs were only asked of half the sample. General population, Singapore. Data showing the top 3 trust-building actions, with ties broken by decimal.

Restoring Trust in the Promise of Innovation

Implementation as important as invention

Mismanaged innovations are as likely to ignite backlash as advance society. With breakthroughs like AI, vaccines, and green energy on the line, explaining the science and managing impacts is essential.

Business must partner for change

Government is most trusted to introduce innovation into society, and Business must forge effective partnerships to leverage this trust. CEOs need to safeguard jobs and take a stand on emerging ethical concerns.

Science must integrate with society

Scientists are still trusted but increasingly subject to public scrutiny. To build trust in expert recommendations, explain the research, engage in dialogue, and harness peer voices as advocates.

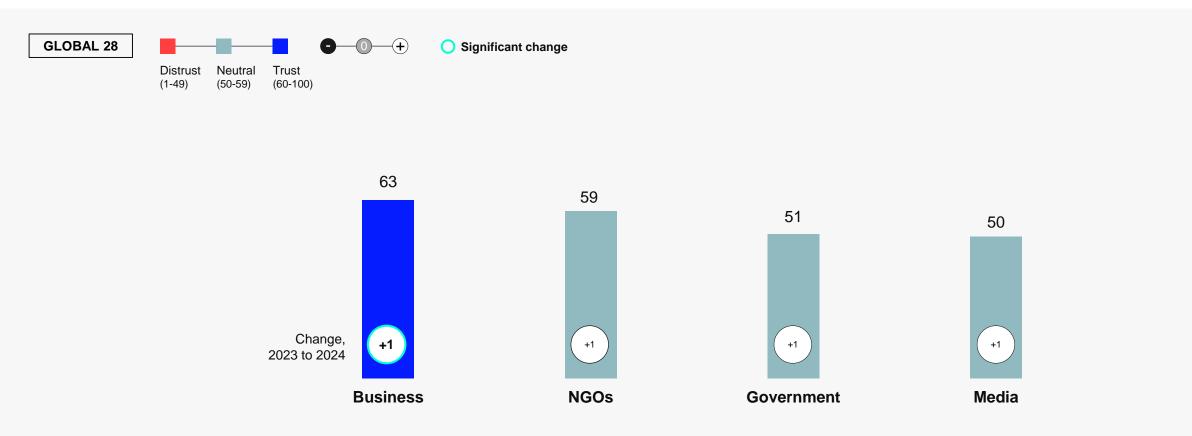

Give me control over my future

When people feel in control over how innovations affect their lives, they are more likely to embrace them, not resist them. Listen for concerns, be open to questions.

Supplemental Data

Business Remains Only Trusted Institution

Percent trust

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 Trust Index has been imputed using a model. For more details, please see the Technical Appendix.

Institutions Out of Balance: Government Seen as Far Less Competent and Ethical than Business

(Competence score, net ethical score)

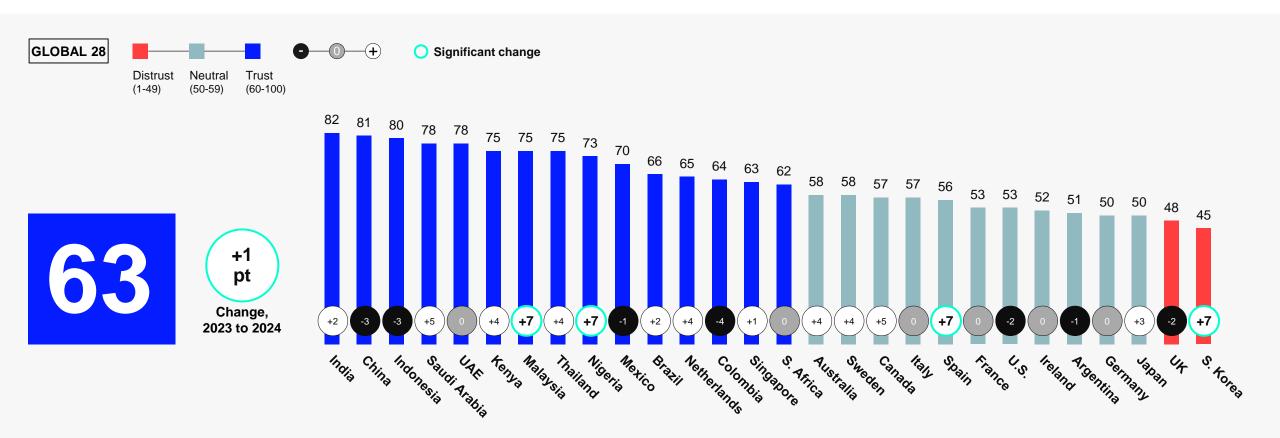

GLOBAL 25 Excludes China, S. Korea, Thailand

Ethical NGOs (1, 20) Business (17, 17) Less competent Competent Media (-17, -4)Government 52 pts less Government competent than business (-35, -15)Unethical

2024 Edelman Trust Barometer. The ethical scores are averages of nets based on [INS]_PER_DIM/1-4. Media and NGOs were only asked of half the sample. The competence score is a net based on TRU_3D_[INS]/1. Media and NGOs were only asked of half the sample. General population, 25-mkt avg. Data not collected in China and Thailand; Due to a translation inconsistency in S. Korea, it has been excluded from this analysis. For full details regarding how this data was calculated and plotted, please see the Technical Appendix.

Business Trusted in 15 of 28 Countries

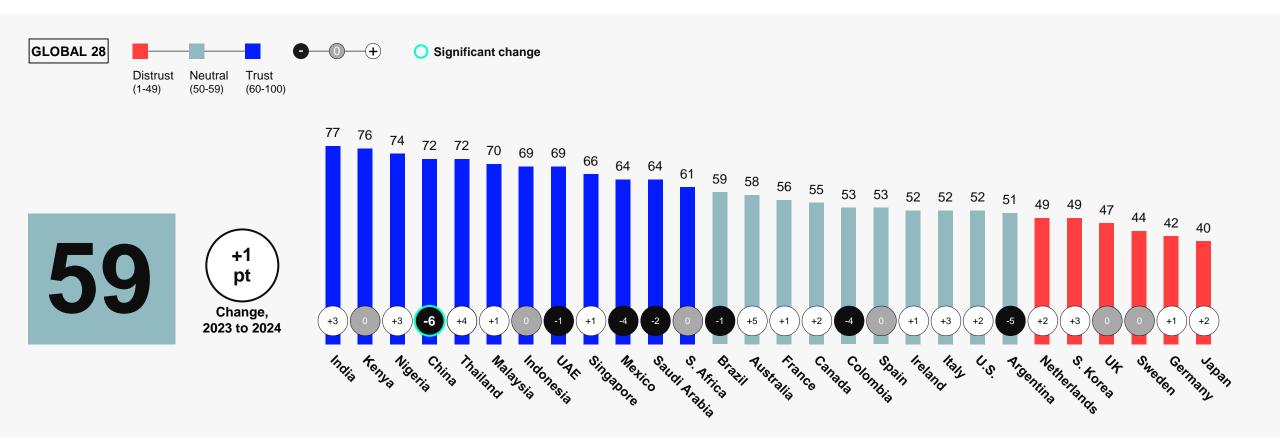

Percent trust in business

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

NGOs Trusted in 12 of 28 Countries

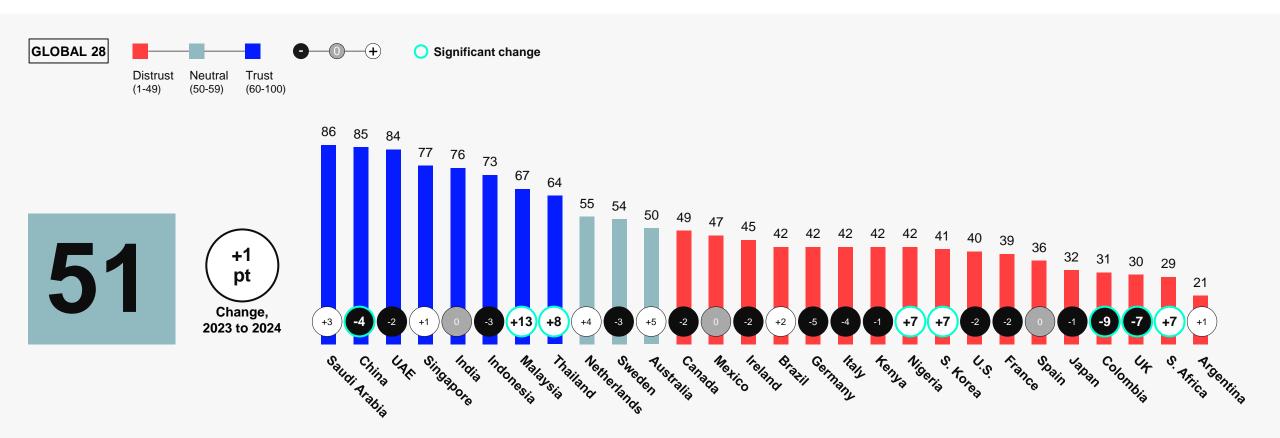

Percent trust in NGOs

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Government Distrusted in 17 of 28 Countries

Percent trust in government

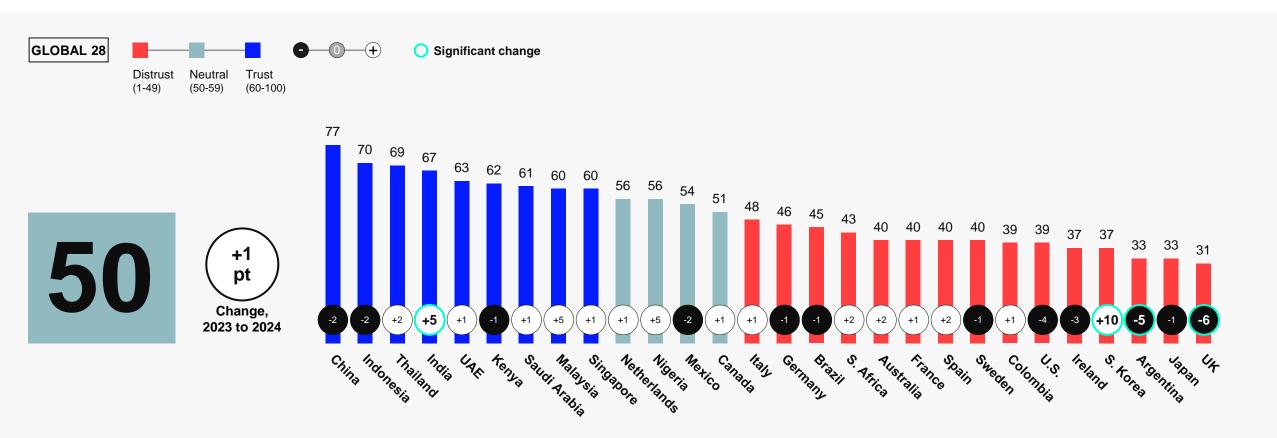

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 government in general data has been imputed using a model. For more details, please see the Technical Appendix.

Media Distrusted in 15 of 28 Countries

Percent trust in media

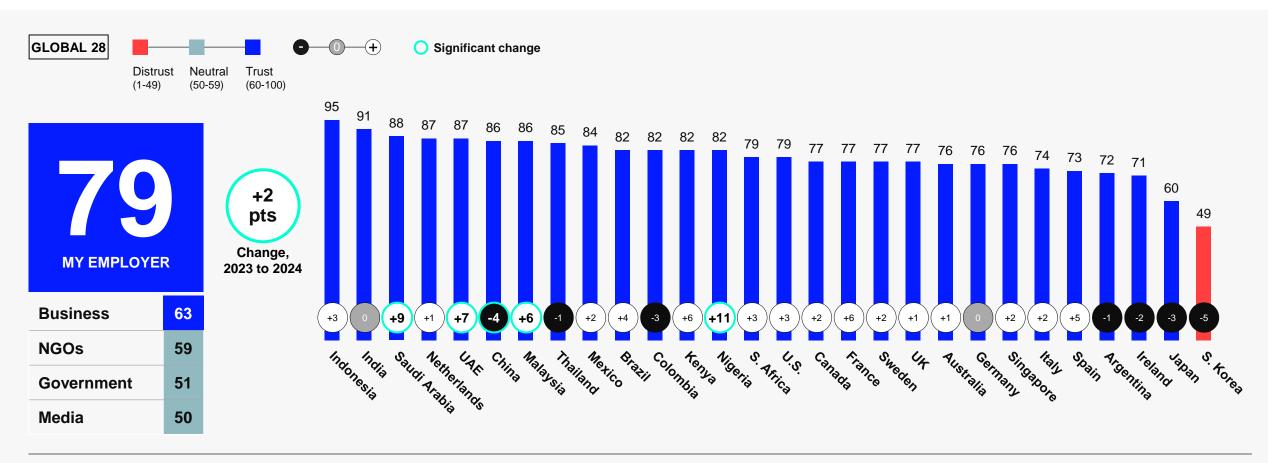

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

For S. Korea, the language used in 2023 for "media" translated to "press." In 2024 it was adjusted to translate as "media."

My Employer Trusted in 27 of 28 Countries

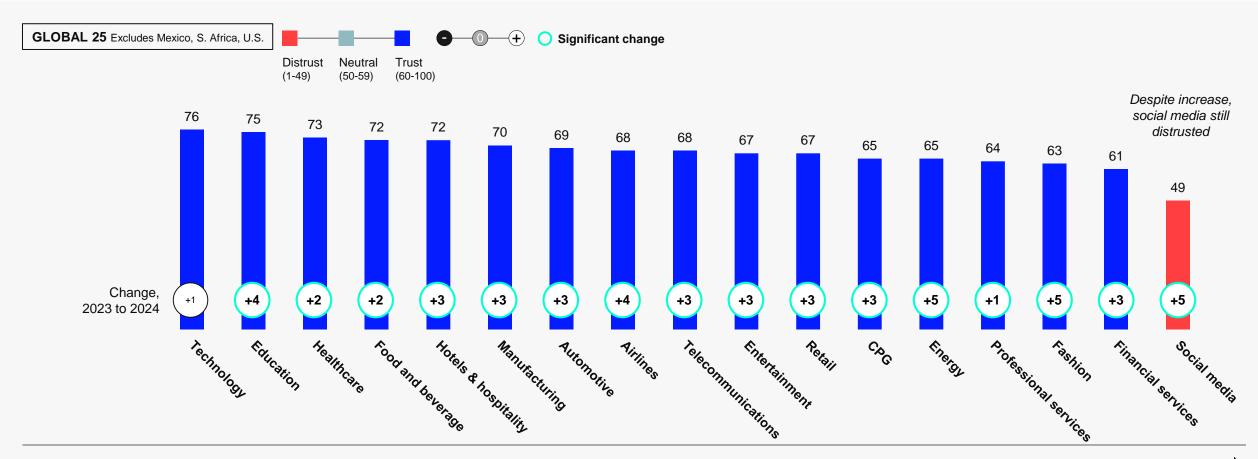

Percent trust

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. "Your employer" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Significant Trust Increases Across Most Industry Sectors

Percent trust in businesses in the following industries to do what is right

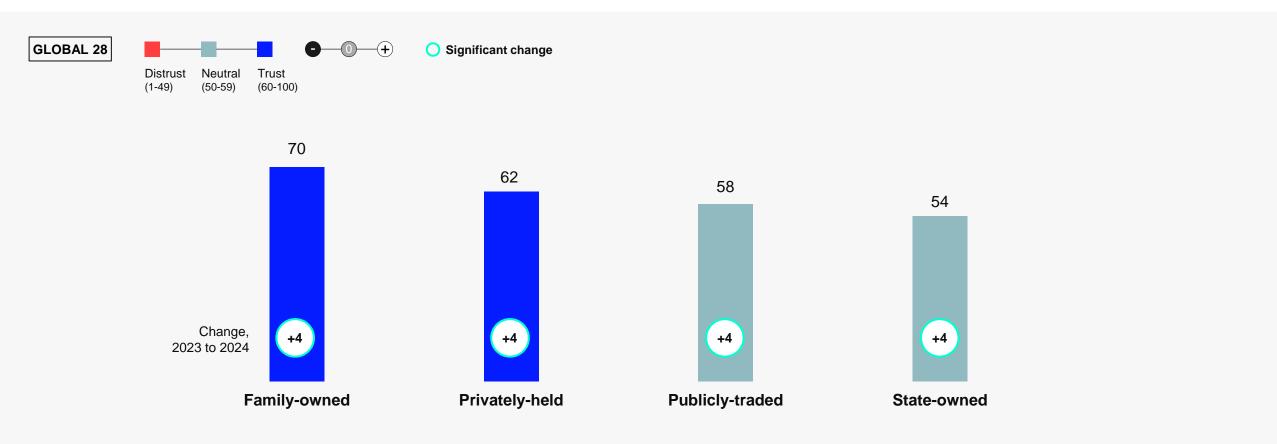

2024 Edelman Trust Barometer. TRU_IND. Please indicate how much you trust businesses in each of the following industries to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 25-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In S. Africa, the Afrikaans translation for "Food and beverage" was updated in 2024. In Mexico and the U.S., the Spanish translation for "Automotive" was updated in 2024. These language changes mean the 2024 data cannot compared to data from previous years and have been removed from this analysis for all sectors to ensure a consistent global average is shown for each.

Family-Owned Businesses Most Trusted

Percent trust in each type of business to do what is right

2024 Edelman Trust Barometer. TRU_ORG. Thinking about different types of businesses, please indicate how much you trust each type of business to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Family-Owned Business Most Trusted Type of Business

Percent trust in each type of business to do what is right

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	10yr change

1. Data reported on slides is weighted to the same total base size to ensure each country has an equal effect on the global average. Some questions were asked of only half of the sample. Please refer to the footnotes on each slide for details.

2. The "global average" indicates the average result of all the countries where data was collected. As mentioned above, there has been no adjustment made to the population size relative to each country and the global average is not intended to suggest a total result of the entire global population.

3. Margin of error is calculated on the unweighted sample sizes collected, utilizing a 99% confidence interval.

4. There were additional quotas on ethnicity in the UK and U.S., and on nationality in Saudi Arabia and the UAE.

5. All data collected in China is from the mainland. Regions of Greater China were not surveyed.

2024 Edelman Trust Barometer: Sample

Countries Included in the Various Global Averages

1. Because some of the content we ask is deemed politically sensitive there are several countries where we take special precautions in order to avoid putting our respondents, or ourselves, in a position to break any local laws. We work closely with our sample partner and its legal team to identify which questions, and in what countries, we should refrain from asking. The three countries where we removed questions and/or answer options were China, Saudi Arabia, and Thailand.

2. Due to a translation inconsistency regarding the measure of competence in the four main institutions in S. Korea, the data was removed from the global average on the affected slide.

2024 Edelman Trust Barometer: Sample

Survey Languages Used and Internet Penetration by Country

	Languages	Internet Penetration*		Languages	Internet Penetration*		Languages	Internet Penetration*
Global	-	-	Indonesia	Indonesian	76%	Singapore	Localized English, Simplified Chinese	92%
Argentina	Localized Spanish	91%	Ireland	Localized English	89%	S. Africa	Localized English, Afrikaans	63%
Australia	Localized English	89%	Italy	Italian	91%	S. Korea	Korean	97%
Brazil	Portuguese	83%	Kenya	Localized English	84%	Spain	Spanish	92%
Canada	Localized English, Canadian French	93%	Japan	Japanese	93%	Sweden	Localized English, Swedish	97%
China	Simplified Chinese	70%	Malaysia	Malay	94%	Thailand	Thai	88%
Colombia	Localized Spanish	83%	Mexico	Localized Spanish	77%	UAE	Localized English, Arabic	100%
France	French	92%	Netherlands	Localized English, Dutch	95%	UK	Localized English	95%
Germany	German	94%	Nigeria	Localized English	68%	U.S.	English, Localized Spanish	94%
India	Localized English, Hindi	60%	Saudi Arabia	Localized English, Arabic	89%			

Due to disproportionate access to internet in countries with lower internet penetration, the online sample in those countries tends to skew younger, urban, and more affluent.

Data Analysis Explained: French Data Model

In 2021, the translation of "government in general" in the French questionnaire was incorrectly changed to "authorities in general," affecting data in all studies conducted in France from 2021 to 2023. When we discovered the inconsistency in early 2023, we suppressed all affected data while investigating the possibility of modeling and replacing the missing data.

Over the course of 2023, we built a data model that could reliably predict what the France data would have been if the translation were consistent. This involved identifying items (shown in the list on the right) that are predictive of trust in government in other Western democracies and testing whether they had similar predictive power in France.

To build a model with a sufficient level of accuracy, we iterated through 5,000 different randomly split samples, controlling for gender, income, age, and other demographics, of France data collected in the 2024 Edelman Trust Barometer and in the 2023 Special Report: Trust and Climate Change. In both surveys, we used the accurate translation for trust in "government in general," along with the predictor variables. In both surveys, we also included the trust in "authorities in general" attribute for our French respondents. This allowed us to include the mistranslated variable in our model as one of the predictors for trust in government.

For each split sample, 75% of the sample was used to train the data, and the remaining 25% was used as a test group. Using a random forest classification model, we were able to accurately classify 89.41% of respondents as trusters or non-trusters, which gave us the confidence to repopulate the data in affected reports with data from our predictive model.

The modeled data was applied to the France data from each impacted year (2021, 2022, and 2023) to predict the overall level of trust in government in general. The Trust Index for those years has also been updated, given that trust in government is part of that calculation.

Predictors	Question text
	TRU_INS: Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you "do not trust them at all" and nine means that you "trust them a great deal".
Trust in institutions	Media in general
	Business in general
	Non-governmental organizations (NGOs)
	Authorities in general
Economic optimism	CNG_FUT: Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years' time?
Government	TRU_3D_GOV: To what extent do you agree with the following statement?
competence	Government in general is good at what it does
Fears of gig-	POP_EMO: Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following?
economy	Permanent jobs with benefits being replaced by freelance, gig-economy or short-term jobs that do not offer benefits
	GOV_PER_DIM: In thinking about why you do or do not trust government in general, please specify where you think it falls on the scale between the two opposing descriptions.
Government	Highly effective agent of positive change
ethics dimensions	Honest and fair
	Has a vision for the future that I believe in
	Serves the interests of everyone equally and fairly

Data Analysis Explained: Innovation Management Scale

The Innovation Management scale was created by averaging respondents'
answers to five attributes measured on 9-point scales, shown in the table to the
right.

- Respondents who believe that innovation is well managed were those that scored between 1 – 4.49 on the Innovation Management Scale, meaning on average they disagreed with these statements.
- Respondents who scored between 4.5 5.49 on the scale were classified as neutral.
- Respondents who believe that innovation is poorly managed scored between 5.5 – 9 on the Innovation Management Scale, meaning on average they agreed with these statements.

The specific items in the scale were chosen for their ability to represent three dimensions of innovation management and development:

- **Trust in institutions** to manage the introduction of new technologies and innovations
- Government's ability to regulate emerging technologies effectively
- Outside influence on science, in terms of how it's conducted

Items	Question text
Trust in business and NGOs	TRU_INS_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are <u>safe</u> , <u>understood</u> by the public, <u>beneficial</u> to society as a whole, and <u>accessible</u> to the people who need them). – <i>reverse scored</i>
	Business in general
	Non-governmental organizations (NGOs)
Government	POP_MDC. Below is a list of statements. For each one, please rate how <u>true</u> you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true".
regulation	The people in government in charge of regulating technology do not have an adequate understanding of emerging technologies to be able to regulate them effectively
0.1	CHG_AGR. Please indicate how much you agree or disagree with the following statements.
Science influenced by politics and money	Science has become politicized in this country
	Government and other large organizations that fund research have too much influence on how science in this country is done

Data Analysis Explained:

Classifying Respondents as Generally Resistant to Innovations

Respondents were asked to characterize their feelings about each of the four innovations (shown below) using the scale to the right.

To classify respondents as resistant to innovations, we calculated an average score across the four innovations. If a respondent's average score was less than 2.5 (rounded to a 1 or 2), they were classified as rejecting of innovation.

Innovations

The growing use of **artificial intelligence** such as machine learning, natural language processing, and generative Al

The growing use of **green energy** such as biofuels and renewable natural gas, liquid hydrogen, and wind and solar power

The growing use of **genetically modified foods** (foods that are derived from genetically modified organisms, commonly referred to as GMOs) such as drought-, pest-, and disease-resistant crops, faster-growing fish, and produce that has a longer shelf life

The growing use of **gene-based medical technologies** such as mRNA vaccines, gene splicing, and gene therapy

Scale points

- 1. **Resistant**: I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.
- 2. **Hesitant**: I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.
- **3. Comfortable**: I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.
- 4. Enthusiastic: I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.
- 5. **Passionate**: I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.

Data Analysis Explained: Average Acceptance Rating

Respondents were asked to separately rate four technologies (green energy, artificial intelligence, gene-based medicine, and GMO foods, as shown on the previous Tech Appendix slide) on a 5-point scale, ranging from Resistant to Passionate (see full scale to the right). We calculated overall levels of acceptance across the population by taking the average scale point selected.

Segments of the population were classified as one of the five categories, based on the cut points in the table to the far right.

- If the average of an audience segment fell between 1-2.49, they were classified as "rejecting" the innovation.
- Audience segments with an average score of 3.5-5 were classified as "embracing" the innovation.

This method of calculating an average acceptance rating was applied to different audiences throughout the report.

Segment category	Range
Resistant : I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.	1-1.49
Hesitant : I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.	1.5-2.49
Comfortable : I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.	2.5-3.49
Enthusiastic : I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.	3.5-4.49
Passionate : I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.	4.5-5
Don't know / not sure	

Data Analysis Explained:

How We Plotted the Institutional Competence and Ethics Scores

We define trust as the combination of competence and ethics. The report features a chart depicting how competent and ethical each of the institution are rated to be. Here's how we calculated each score.

The competence score (the x-axis of the plot): An institution's competence score is a net of the top 3 box (AGREE) minus the bottom 3 box (DISAGREE) responses to the question "To what extent do you agree with the following statement? *[INSTITUTION] in general is good at what it does*". The resulting net score was then subtracted by 50, which means that for an institution to qualify as competent, it would require a net difference of 51 points or more in its percentage of top 3-box ratings versus its bottom 3-box ratings. This ensures that an institution could not be considered competent unless there is a majority who rate it as such.

The net ethical score (the y-axis of the plot): The ethics dimension is defined by four separate items. For each item, a net score was calculated by taking the top 5 box percentage representing a positive ethical perception minus the bottom 5 box percentage representing a negative ethical perception. The y-axis value is an average across those 4 net scores. Scores higher than zero indicate an institution that is perceived as ethical.

Respondents were asked:

In thinking about why you do or do not trust [INSTITUTION], please specify where you think they fall on the scale between the two opposing descriptions. (Please use the slider to indicate where you think [INSTITUTION] falls between the two extreme end points of each scale.)

Dimension	Ethical Perception	Unethical Perception
Purpose-Driven	Highly effective agents of positive change	Completely ineffective agents of positive change
Honest	Honest and fair	Corrupt and biased
Vision	Have a vision for the future that I believe in	Do not have a vision for the future that I believe in
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people
